Expression cassettes comprising a polynuciectide encoding antigenic type C human immunodeficiency virus (HIV) Gaq or Env polypeptides are useful in DNA immunization, generation of packaging cell lines and production of Gag- and/or Env-containing proteins. Synthetic Env and Gag expression cassettes exhibit increased potency for induction of cytocoxic T-lymphocyte (CTL) responses by DNA immunization. Gag of HIV-1 self-assemble into non-infectious virus-like particles which are used as a matrix for the proper presentation of an antigen entrapped or associated to the immune system of the host.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Polynucleotide encoding antigenic type C HIV Gag polypeptide or a HIV Env polypeptide and the polypeptide useful for immunizing a mammal especially human against HIV
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           etgegeeeeggeggeaagaagtgetacatgatgaageaeetggtgtggggeeageegegg 120

The present sequence is the coding sequence of a HIV Gag expression cassette, Gag.ModSF2. The Gag protein of HIV is needed for the assembly of virus-like particles. In addition, the Gag protein is involved in many stages of the HIV life cycle, including assembly, virion maturation after particle release and early post-entry steps in viral replication. The expression cassette may be used for the recombinant expression of HIV Gag-polypeptides which may then be used to vaccinate against HIV

The present invention relates to synthetic HIV Gag and Env expression cassettes. The Gag protein of HIV is needed for the assembly of virus-like particles. In addition, the Gag protein is involved in many states of the HIV life eyele, including assembly, virion maturation after particle release and early post-entry steps in viral replication. The

The present invention relates to synthetic HIV Gag and Env expression cassettes. The Gag protein of HIV is needed for the assembly of virus-like particles. In addition, the Gag protein is involved in many stages of the HIV life cycle, including assembly, virion maturation after particle release and early post-entry steps in viral replication. The expression cassettes may be used for the recombinant expression of HIV
                                                                                                                                                                                                                                                                                                                                                                                      Gag- and Env-polypeptides which may then be used to vaccinate against HIV infection and acquired immunodeficiency syndrome (ALDS). The present sequence is a synthetic construct constructed in the generation of the persent invention. This construct is bicistronic in that the coding sequences for Env and Gag are under the control of a single CMV promoter and between the two coding sequences an Internal Ribosome Entry Site (IRES) is present.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     1435 geogeoggeaceggeaacageageageeggtgageeagaactaceceategtgeagaacetg 3494

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           28 - NoV - 2000                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              AAA70471 cassettes. The day protein of HV is needed for the assembly of virus-like particles. In addition, the day protein is involved in many stages of the HIV life cycle, including assembly, virion maturation after particle release and early post-entry steps in viral replication. The expression cassettes may be used for the recombinant expression of HIV day—and Env-polypeptides which may then be used to vaccinate against HIV infection and acquired immandaticiery syndrome (ALES). The present sequence is a synthetic constructed in the generation of the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        expression cassettes of the present invention. This construct is biotstronic in that the coding sequences for Env and Gaq are under the control of a single CMV promoter and between the two coding sequences an Internal Pibesome Entry Site (IPES) is present
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           3216 otgogeccoggegagacaagaaagtacaaqetagaageacateqtutgageccageoqaaq 3275

cassettes. The Gag protein of HIV is needed for the assembly of virus-like particles. In addition, the Gag protein is involved in many stages of the HIV life cycle, including assembly, virion maturation after particle release and early post-entry steps in viral replication. The expression cassettes may be used for the recombinant expression of HIV cast and Euv-pulypetitaes which may then be used to vaccinate against HIV infertion and acquired immunodeficiency syndrome (AIDS). The present sequence is a synthetic construct constructed in the generation of the pricing of the present invention. This construct is blicistronic in that the coding sequences for Env and Gag are under the control of a single CMV promoter and between the two coding sequences an internal Ribosome Entry Site (IRES) is present.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             3233 atgggggccgggccagcgtgctgagcggcggcgagctggacaagtgggagaagatccgc 3292

The present sequence is a HIV Gaq/Hepatitis C virus (HCV) core fusion coding sequence. The Gaq protein of HIV is needed for the assembly of virus-like particles. In addition, the Gaq protein is involved in many stages of the HIV life cycle, including assembly, virion maturation after particle release and early post-entry steps in viral replication. The present invention relates to synthetic HIV Gaq expression cassettes. The present sequence was cloned and used to generate the expression cassettes of the present invention. The expression cassettes may be used for the recombinant expression of HIV Gaq-polypeptides which may then be used to vaccinate against HIV infection and acquired imminodefliciency syndrome

the present sequence is the coding sequence of a HIV Gag protease expression cassette, GagProtMod.SF2 (GPI). The Gag protein of HIV is needed for the assembly of virus-like particles. In addition, the Gag protein is involved in many stages of the HIV life cycle, including assembly, virion maturation after particle release and early post:entry steps in viral replication. The expression cassette may be used for the recombinant expression of HIV Gag-polypeptides which may like be used to vaccinate against HIV infection and acquired immunodeficiency syndrome
                                                                                                         Liu H;
                                                                                                                                                                                                Expression cassettes encoding the human inmunodeficiency virus (HIV)
                                                                                                                                                                                                                Gag-containing polypeptide useful for vaccinating against HIV

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      The present sequence is the coding sequence of a HIV Gag-polymerase expression cassette, GagPol.ModSF. The Gag protein of HIV is needed for the assembly of virus-like particles. In addition, the Gag protein is involved in many steads of the HIV like eyole, including assembly, virton maturation after particle release and early post-entry steps in viral replication. The expression cassette may be used for the recombinant expression of HIV Gag-polypeptides which may then be used to vaccinate against HIV infection and acquired immunodeficiency syndrome (AIDS).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                67 etgogococoggogaagaagaagtacaagctgaagcaacatcqtqtqqqccaqccqcqag 126

                                          therapy or gene replacement with improved safety. They can also be used in the development and production of vaccines and biochomical reagents. The present sequence is a gag coding region of codon optimised HIV gagpool sequence. This sequence is used in the packaging
